

DEMINEALIZED WATER

- Description:** Demineralized water with conductance of 0.06 μs
It is obtained after processing of well water through anion exchange resins.
- Use:** It is used as raw material for production of vapor, antifreeze, liquid for windshield wipers etc.
- Classification:** Meets the requirements of the Bulgarian legislation

CHARACTERISTICS

INDEXES	NORM
Appearance: (visually)	Limpid liquid
Color: (visually)	transparent
Conductance	0.06 μs
Handling the product:	<ul style="list-style-type: none">• Protection equipment is not required.
Package:	<ul style="list-style-type: none">• Auto tanker• IBC container 1 metric tonne.• Plastic drum
Storage:	Storage temperature: from 0 °C to 40 °C.

The present technical description has the purpose to inform the clients on the quality of our product. The data herein is based on our present best knowledge. We invite our clients before work to check the quality of the product or its adaptation to the base and to make an experimental application. Our clients must be sure, that the present technical description hasn't been changed or replaced by a newer edition.
